

Subject: Reduced-Rate Water Testing Services for Flood-Affected Residents

Dear Community Member,

We know this has been an incredibly difficult time for many families and businesses in our surrounding areas who have been impacted by recent flooding. Floodwaters can compromise private wells and water systems, introducing bacteria, chemicals, and other contaminants that may not be visible or detectable by taste or smell.

As your local laboratory, we are committed to supporting our community during recovery. To help ensure the safety of your drinking water, **Clean Water Testing in Appleton WI** is offering **water testing services at a reduced rate** for residents and property owners affected by the flooding.

Our flood-related water testing services can help identify:

- Bacterial contamination (such as coliform and E. coli)
- Nitrates and other common flood-related contaminants
- Additional parameters upon request, based on your specific concerns
-

Reduced-Rate Flood Recovery Testing

- Available to flood-affected properties in **Outagamie, Waupaca and Winnebago**
- Discounted pricing valid through **06/30/26**
- Fast, reliable results from a State DNR/EPA certified local laboratory

Ensuring your water is safe is an important step in protecting your health and peace of mind as you recover. Our team is available to answer questions, assist with sample collection instructions, and help you determine the most appropriate testing for your situation.

To learn more or to schedule your testing, please contact us at:

- **Phone:** (920) 733-7590
- **Email:** info@cleanwatertesting.com
- **Website:** www.cleanwatertesting.com

Please do not hesitate to reach out—we are here to help. Our thoughts are with everyone affected, and we are honored to support our community during this time.

Sincerely,

Cheryl Harrmann
Laboratory Director
